"Moreover it is required in stewards, that a man be found faithful." 1 Corinthians 4:2. Few words better describe the human condition relative to the called of God, we must stay on the job. Since the call to service, Jolaine and I have never looked for the exit ramp off of the great narrow highway of service but always asking our Savior for the next assignment. You, the churches, have seen that in us and have trusted us with the faithful monthly support and prayers necessary to pursue the call of God and HIS great commission. Thus, we thank you and bless you for your commitment to us. Pray for us as we strive to preach the Gospel to all nations and to teach the all-things commanded by our Lord.

How else do we express the volume of constant studying, writing, producing, teaching through outreach and recording for our Radio coverage throughout Central America and now into Colombia, South America! Not to mention constant revisions, posting on website and forwarding to our radio listeners.

I can really, really get weary with travel! Did I just say that???? As I continue to go each week to Palmares and teach Enoc through God's Plan for the Ages, I marvel at what the Lord is doing to keep us 'keeping-on'! We now have four new outreach teaching gatherings around the Canton of Palmares. As these principals were being taught this week in Esquipulas ... one man expressed "If these things are true then I need to be saved!"

The gifting of the building and property miracle that happened in Palmares still has a few 'legal' formalities to complete. We patiently labor and wait. Current plumbing issues have no patience and have to be resolved now! We have realized that there were several water leaks under the slab of the auditorium, so all supply water had to be redone including the parsonage. That project is finished but now we face an even greater challenge with the septic tank and leach lines. The tanks that were dug years ago were not fortified with pre-fab tanks or blocks to form the sides. The result is that the dirt sides have caved in refilling the holes and there is no place for the septic water and solids to go. Yep, they make plastic septic 'tanks' here in the country but not in our financial reach. Solution, you ask!!!! We just purchased SIX 55-gallon steel drums that we are welding together for the tanks. Our design ... I'll simply spare you those details! They were purchased for a mere \$75,000 colones or \$116.00 dollars! Enoc and I were praising Jesus all the way home....we have enough savings to find someone else to dig those holes! We are both way too old to be doing this! Every one of us can witness to the necessity ... from time to time ... to break out the tools for the glory of God!!!

Bolivarian Republic of Venezuela

We have made a presentation of appeal to major radio stations in Venezuela. We continue to patiently wait on a response. Also, the many Venezuelans who have sought refuge in Colombia now have access to daily teachings and could be an avenue of appeal on our behalf! All that to say that we have made a great effort to actually get into Venezuela and simply wait upon the Lord.

At least for the moment, it would seem that God would have us to prepare to take the ministry to English speaking Guyana, South America. This country was settled by the Dutch and English adventures but populated by African blacks from the slave trade. Even though I have written and recorded right at 300 concepts in English (600 programs), they must all be recorded again to a more concise, two day, format. I have about 100 ready but months of labor yet to go. As my precious grandmother would say, 'we'll let no moss grow under our feet,' as we continue to both 'go' and 'sow'!
