

BRINGING COMFORT TO YOUR WORLD

An electric pump begins humming. Immediately a fine mist of water-based insecticide appears out of the nozzles located in the ceiling of the barn. The light air currents in the barn slowly swirl the mist around, and flies, mosquitos, hornets, wasps and no-see-ums begin dropping out of the air, dead. After a minute the pump shuts off and the mist vanishes.

Since 1979, Shoo-fly Automatic Insect Control Systems have been helping keep barns, patios and commercial facilities free of flies and other flying insects, safely and conveniently.

The insecticides and Automatic Insect Control System in the above scenario are a result of feedback from experienced horsemen and businessmen who require a safe, economical and effective insect control system.

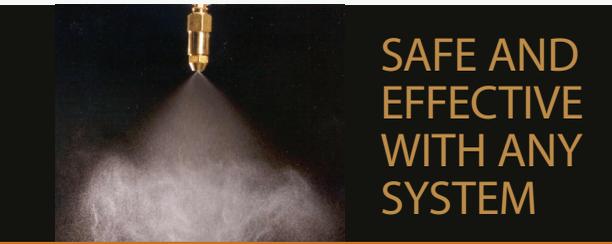

The Automatic Insect Control System is programmable in operation of the desired cycle time and hour of the day (24-hour). This system eliminates waste to save insecticide costs and is extremely convenient.

These Automatic Insect Control Systems are manufactured in Ocala, Florida and are custom-designed for your facility. They are easily installed, taking an average of 20-30 minutes per nozzle for installation.

We maintain a complete inventory of all Shoo-fly system parts and insecticides, ready to ship anywhere in the United States.

SAFELY CONTROLLING FLIES AND FLYING INSECTS FOR OVER 40 YEARS.

SAFE AND EFFECTIVE WITH ANY SYSTEM

Because Shoo-fly products are compatible with all other overhead misting systems, you can use our safe and effective water emulsifiable insecticides with any competitor's system.

Most of our customers maintain their own system and enjoy the savings and the lowest prices available anywhere. For those who don't have the time or desire, there are Shoo-fly distributors throughout the U.S. that are happy to help.

"We wouldn't think of having a facility of this calibre without having the same quality of fly system to protect it."

Therapy & Rehabilitation
Ocala, FL*

SHOO-FLY INSECTICIDES are not harmful to you, your employees, your animals or the environment when used as directed. Shoo-fly specially formulated water-based insecticides are biodegradable, approved for use around humans and all other warm-blooded animals and may be used in food processing facilities, bakeries, bottling plants, canneries, flour mills, hospitals, hotels, restaurants, schools and barns. We meet all the strict requirements of the Environmental Protection Agency.

Concentrate I

ACTIVE INGREDIENTS:
3.00%.....Pyrethrin
30.00%.....Piperonyl Butoxide Technical

This powerful formula is a water emulsifiable broad spectrum insecticide concentrate made from natural pyrethrins (extract of a Chrysanthemum flower) and is synergized to give you an effective, economical solution to control insects. Mix one gallon Concentrate I with 39 to 54 gallons of water; it then becomes a micro-emulsion for use through the overhead insecticide system. It will stay in suspension for up to one year, depending on the quality of the water used.

Naturally

A ready to use spray that is non-toxic, proven to be effective protection against flies, ticks, mosquitoes, fleas, chiggers, gnats, no-see-ums, horse flies, deer flies and other biting insects.

INGREDIENTS:
A proprietary blend of Agrisyn®, Cedar Oil, Citronella, Lemongrass and Lemon Eucalyptus.
NOT for use in Overhead Units.

Livestock & Poultry Concentrate plus PBO

ACTIVE INGREDIENTS:
Livestock & Poultry Concentrate
10.00%.....Permethrin P.B.O. Concentrate
91.30%.....Piperonyl Butoxide Technical

Livestock & Poultry Concentrate plus PBO is an old friend in our arsenal that has been upgraded with a new sophisticated emulsification system that makes it convenient to mix and increases its stability to stay in suspension for a longer period of time.

A powerful mixture of Permethrin (synthetic pyrethroid) used with the PBO (synergist) gives you a powerful, yet economical solution to controlling insects.

When used through the automatic overhead insect control system, **Livestock & Poultry Concentrate plus PBO** protects horses and livestock from attacks of horse flies, stable flies, face flies, deer flies, houseflies, horn flies, mosquitoes, gnats, no-see-ums, and numerous other flying insects.

Don't just take our word for it...

Melanie and JT Burnley WRENWOOD DRESSAGE

"We customarily use Shoo-Fly for all of our insect problems. They have been a stellar company to work with and produce an exemplary product that provides almost 100% eradication of flying pests. It has a tremendous ease-of-use. It is easy to clean and service.

If we ever have a problem all we do is contact them via cellular and they provide an immediate solution and ship additional parts or products as we add onto our system. Their staff is always friendly, polite, and helpful. Their service is affordable, and saves us money over applying fly spray individually. I would give them 5 out of 5 stars. Truly a well-organized, well-thought-out product that each and every horse owner with flying pests could be well served by."

Caryn Henry CARYN HENRY BARREL HORSES

"I bought a new farm and moved. The new barn had a horrible fly problem. I tried several things to get rid of the flies, but nothing worked. I installed my Shoo-Fly system last year and have had no more fly problems! I was shocked at how fast it worked - within a couple of days they were all gone!"
