

Concentrate
AGRISYN®

is a
**Super
Surfactant**

Make your
world a
cleaner
place

- Effective in healing wounds, thrush, rainrot fungus, scratches and many other maladies
- Cleans and disinfects
- Removes pathogens and emulsifies
- Improves your biosecurity protection
- Safe for people, animals and environment
- Safe for sensitive animals
- Food-grade safe
- Veterinarian recommended
- Enhances other products (i.e. fly spray)
- Commercial strength
- Remains active for 7-21 days
- Non-corrosive, non-toxic, biodegradable
- No shelf life restrictions
- Will not degrade if frozen

FACTS ABOUT SURFACTANTS:

- The word “surfactant” is short for Surface Acting Agent
- It’s primary function is to reduce the surface tension of water
- It allows for water to cover a greater surface, essentially making water “wetter”
- Increases water coverage on a surface with lower volumes
- Optimizes usefulness of water
- Anionic surfactants are the most widely used surfactant for dirt removal
- They have a negatively charged head, making it very good at removing dirt and oils
- The molecular structure of anionic surfactants allows them to interact with dirt, oils and proteins, solubilizing or emulsifying them, removing it from surfaces.

Spray
THEN STAY.

AgriSyn® is useful for wound care and is highly effective in combatting pink eye, foot rot, hairy wart and controls coccidia symptoms. It cleans away deadly viruses like e.coli, salmonella, staphylococcus and listeria.

Safe to clean your animal and their surroundings, AgriSyn® builds a defensive wall that stops viruses from moving and can protect your horse from EHV-1 and Strangles, stop the spread of disease in your kennels or catteries, it will reduce fly exposure and odor.

AgriSyn® may also be used as a powerful synergist for disinfectants or insecticides. You simply won't find a more effective and versatile weapon to protect your home, kennel, stable or processing facility.

CLEANS • DISINFECTS • ENVIRONMENTALLY SAFE

AgriSyn® is a critical step in improving the biosecurity protection and productivity of both companion and commercial animals.

Our biodegradable, non-corrosive, food-grade safe chemistry is safe enough to be used on your animals as a cleaner and effective enough to be used in commercial facilities.

COMPATIBILITY: This product is compatible with chlorine (bleach) and most other common cleaning, sanitizing or whitening chemicals, but a controlled mix test should always be performed prior to batch use.

DIRECTIONS FOR USE: For application on animals, their living areas, and equipment: dilute one (1) part AgriSyn to fifty (50) parts water (1:50 or 2.5 oz per gallon). Thoroughly apply to the entire area to be cleaned or washed using a pump up sprayer, hose attachment or pressure washer.

DISPOSAL: Product is readily biodegradable. Dispose of using normal septic and sewage facilities according to local and state regulations.

INGREDIENTS:

Patented blend of alkyl sulfonate and an alkyl sulfate 36%
 Other 64%
 TOTAL (100% inert) 100%

CAUTION: Keep out of reach of children. This product can be an irritant at full strength.
