

AgriSyn® - Versatile & multipurpose cleaning

Cleans stalls, coops, kennels, buckets, bowls, trailers, wash racks, bits, tack, breeding and boarding facilities.

AgriSyn® is a critical step in improving the bio-security protection and productivity of both companion and commercial animals. Our biodegradable, non-corrosive, food-grade safe chemistry is safe enough to be used on your animals as a cleaner and effective enough to be used in commercial facilities. AgriSyn may also be used as a powerful synergist for disinfectants or insecticides. It kills bacteria, fungus, mold and more on contact, then provides an invisible barrier to continue protecting your livestock and valuable show and breeding animals.

Used effectively by commercial facilities, veterinarians and professional trainers, AgriSyn is a versatile, multipurpose cleaning product for large and small animals and their surroundings. Use it to clean facilities, or apply directly to the animal itself. AgriSyn is an extremely affordable preventative measure to help keep your animals and their surroundings safe and clean.

With a recommended ratio of 1:50 (1 gallon of concentrate makes 50 gallons of multipurpose wash), the product can be diluted at a very minimal cost and used in a variety of applications.

MULTI USE

There are as many different applications for Shoo-fly's AgriSyn® as there are people who swear by its incredible effectiveness. Have a use we haven't mentioned? Send us an email!

AgriSyn® is a powerful synergist, when adding disinfectant, it will dramatically increase its effectiveness:

- Spray tack to prevent transporting diseases between animals
- Prevents spreading of e. coli, salmonella, staph, bacteria, virus, parvovirus, strangles, fungus, H1N1, EHV-1 when used to clean animals, bedding, stabling or kennels and

equipment

- Disinfect foaling stalls and whelping boxes
- Safe to use on facilities and animals
- Cleans without being toxic
- Spray and leave on for continued action, forms a protective barrier

AgriSyn® can also be used in these additional applications:

- Enhances recovery time on wounds, won't sting when applied
- Foaming action helps adhere to wounds and dressings.
- Effective in reducing proud flesh in wounds
- Eradicates scratches, rain rot and other topical maladies on horses
- Can be used in a netty pot to reduce sinus infection
- Use as a bath wash for horses or dogs, creates a protective barrier that helps reduce airborne viruses
- Hard goods cleaner
- Cleans feeding and living areas and premise walls

DIRECTIONS FOR USE: For application on animals, their living areas and equipment: dilute one (1) part AgriSyn to fifty (50) parts water (1:50 or 2.5 oz per gallon). Thoroughly apply to the entire area to be cleaned or washed using a pump up sprayer, hose attachment or pressure washer.

COMPATIBILITY: This product is compatible with chlorine (bleach) and most other common cleaning, sanitizing or whitening chemicals, but a controlled mix test should always be performed prior to batch use.

DISPOSAL: Product is readily biodegradable. Dispose of using normal septic and sewage facilities according to local and state regulations.

INGREDIENTS: Patented blend of alkyl sulfonate, and an alkyl sulfate 36% Other 64% TOTAL (100% inert) 100%

CAUTION: Keep out of reach of children. This product can be an irritant at full strength.
