**MORE BENEFITS
THAN YOU CAN
IMAGINE IN JUST
HALF A TABLESPOON**

“Comparing Blue Green Algae to other supplements.... you can see results in six weeks instead of six months! The most experience I have had is with founder horses. **THIS HEALS THE FOOT.**” - Leroy M, Sarasota, FL

Natural Way Blue Green Algae is an

exceptional source of vitamins, digestive enzymes, minerals, amino and fatty acids. Rich in minerals like calcium, potassium, magnesium, absorbable organic iron, as well as trace minerals like selenium and chromium. It also contains fiber and the entire B-complex, especially B12, in a source proven to be effective.

“I noticed the animals and horses eating Blue Green Algae were noticeably more healthy looking. When feeding Blue Green Algae to horses with debilitating laminitis, I was astounded! In six weeks, they were better than I had ever seen or could have imagined.” -

Dean Bader, DVM,
Shingle Springs, CA

“Feeding your animals the essential minerals and vitamins they need will strengthen the immune system and aid cell regeneration. This means less sick and lethargic animals and a quicker, more effective healing process in horses that are injured or have any hoof problems.” Dean Bader, DVM, Shingle Springs, CA
