

The Time Mist dispensers are great for controlling bugs in entrance ways, carports, storage buildings, tack and feed rooms. Can also be used for Odor Control and Air Sanitizer when used with appropriate spray refills.

Most use 2 or 4 AA batteries

Easy to Program

If using for a stall or run in sheds, you may find that using 2 and putting them across from each other will give you good coverage.

Operation instructions are usually inside the door for the dispenser.

Recommended height is about 7 ft from ground.

To Set up your dispenser:

Turn to OFF and Install Batteries

Install spray can making sure that the spray nozzle is facing forward.

Aim dispenser away from face before you turn on and set it.

Set intervals for desired spray.

Replace cans when alerted. Most have a light indicator.

Be sure to turn off before replacing new spray can. Aiming away from face when turning on and resetting.
